

Adding a Google Map to your web page

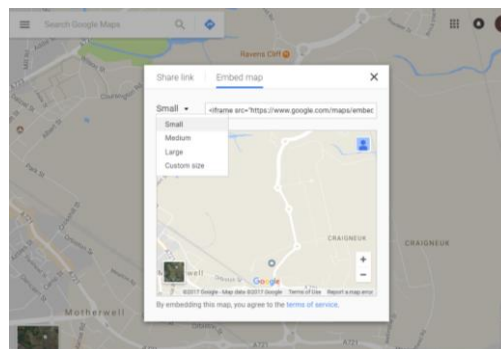

1. Go to Google Maps and type in a location/post code. A map should appear.

2. Click on the little hamburger menu on the top left hand side and choose Share or Embed Map

3. Choose the size of map that you would like then **copy the code** that appears:

```
<iframe
src="https://www.google.com/maps/embed?pb=!1m14!1m12!1m3!1d8973.097937174338!2d-
3.9676203!3d55.788471550000004!2m3!1f0!2f0!3f0!3m2!1i1024!2i768!4f13.1!5e0!3m2!1sen
!2suk!4v1509009873935" width="400" height="300" frameborder="0" style="border:0"
allowfullscreen></iframe>
```

Paste the code into your HTML where you want it to appear on the web page.

That's all there is too it – a live Google map on your web page 😊
